

Year 6

Autumn Term 1

1) Shakespeare - Drama

2) Science/Electricity circuits

September 2019

2. Science:

We will look at how electricity is generated and subsequently converted into other types of energy. We will investigate different types of circuits and influences on the flow of current and how to represent this symbolically. Children will also write a short scientific report to share their findings of an experiment.

English:

Writing:

Learning to read and understand the language of a Shakespearean script. Develop oracy skills through exploring debates and writing biased arguments.

Guided Reading: Refugee Boy

Maths:

Place Value
4 Operations

History:

Explore the life of Shakespeare and his plays and their themes. Children will research Elizabethan theatre and compare aspects such as costume and staging to today's theatres.

1) What skills do I need to stand in the spotlight?

2) What is a spotlight?

Music:

Explore the use of percussion instruments and develop the use of their voice. All of which, will be incorporated into their performance.

Physical Education:

Outdoor – Tag Rugby working towards a Festival for a selected team.

Indoor - Real PE (skills based)

Computing:

2Simple Animation - Storyboarding

RE

Christianity - Rules and their relevance.

PSHE

Dream Schools and New beginnings.

1. Drama:

This topic will culminate with a performance of two Shakespeare plays at South Hill Park, in association with Shakespeare Schools Festival.
